eazypay24

PAYMENTS, WITHOUT LIMITS.

A new generation of payment services

Introducing expanded payment solutions for modern businesses

INTRODUCING THE PLATFORM

eazypay24.com

NEW SERVICES

eazypay24

Introducing new eazypay24 payment services

eazypay24 introduces an expanded range of digital payment solutions, with card processing at the heart of our new offering.

eazypay24

One trusted brand for merchant payment acceptance and digital financial solutions.

PAYMENT TECHNOLOGY

Secure transaction processing, integrated payment infrastructure and flexible connectivity.

MERCHANTS

A connected experience to accept, manage and reconcile digital payments.

The objective: make more payment methods accessible through one coordinated platform.

PRODUCT PORTFOLIO

eazypay24

A connected suite of payment capabilities

01 CARD PROCESSING

Credit, debit and prepaid card acceptance. The lead product for online and supported in-person use cases.

02 MERCHANT CHECKOUT

Hosted payment pages, secure card entry and supported payment-link experiences.

03 ALTERNATIVE PAYMENT METHODS

Additional local and alternative payment rails to support customer choice across markets.

04 RECURRING PAYMENTS

Subscription billing and repeat card payments through supported merchant integrations.

05 MERCHANT PAYOUTS

Merchant disbursements and card payout options, subject to approved processing setup.

06 MERCHANT ANALYTICS

Transaction monitoring, settlement reporting and back-office controls for merchants.

LEAD PRODUCT

eazypay24

Card processing: accept with confidence

A flexible card acceptance layer for merchants serving customers online and across borders.

CARD TYPES

- Credit cards
- Debit cards
- Prepaid cards
- Virtual and physical card programmes where enabled

CARD BRANDS

- Visa
- Mastercard
- American Express
- JCB, Discover and Diners Club (subject to acquiring setup)

ACCEPTANCE FLOWS

- Online checkout and API integration
- Pre-authorisation and capture
- Sales, refunds and reversals
- Supported POS / virtual terminal workflows

Availability of each card brand, channel and card product depends on the merchant, acquirer, country and final program configuration.

HOW IT WORKS

eazypay24

From checkout to settlement visibility

01

CUSTOMER PAYS

Customer selects card or another enabled payment method.

→

02

SECURE AUTHORISATION

Payment data is securely transmitted for processing and authorisation.

→

03

PAYMENT ROUTING

Configured processing connections and routing rules handle the transaction.

→

04

MERCHANT MONITORING

Merchant teams view transactions, statuses, reports and settlement information.

Illustrative flow. Actual routing, settlement timing and merchant access depend on the configured acquiring partners and commercial terms.

eazypay24

FLAGSHIP HIGH-RISK INFRASTRUCTURE

The Preferred Payment Provider in iGaming

99.99% Uptime Router

Cards & APMs

Global cards paired with local alternative payment methods.

Instant Payouts

Real-time player fund distribution without friction.

Instant Banking

Direct account transfers optimized for high conversion.

Crypto & VIPs

Crypto liquidity stack with built-in VIP card whitelisting.

Unified in one single stack — intelligently routed for absolute uptime and maximum volume retention.

PAYMENT SOLUTIONS

eazypay24

Tired of cross-border payment declines?

Higher Approval Rates

Multi-Rail Routing

Seamless Cross-Border Processing

PLATFORM CAPABILITIES

eazypay24

Built for control, visibility and resilience

PAYMENT OPTIMISATION

Routing and retry logic can help direct transactions through configured processing paths.

FRAUD CONTROLS

Fraud screening and configurable controls help identify suspicious payment activity.

DATA PROTECTION

Security-focused processing, encryption and tokenisation options, subject to the configured solution.

BACK OFFICE

Merchant-facing visibility for transactions, reports, account activity and settlement information.

API INTEGRATION

Developer documentation, API connectivity and sandbox testing for supported integrations.

SUPPORT

Merchant assistance and operational support through the EazyPay24 service team.

eazypay24

WHAT UNLOCKS FOR YOU

What eazypay24 Unlocks for You

Smart Payment Routing

Higher global approval rates

Multi-Rail Liquidity

Cards, Instant Open Banking & Crypto On/Off-Ramps

PCI-DSS Level 1 Security

Built for complex & high-growth global businesses

BEYOND CARDS

eazypay24

More ways to move money

MULTI-CURRENCY ACCOUNTS

Existing eazypay24 account services support international business payments and multi-currency activity.

GLOBAL TRANSFERS & FX

SWIFT, SEPA and local payment routes, foreign exchange and international payouts are part of the established offering.

PREPAID CARDS & DIGITAL ASSETS

Existing prepaid Mastercard and fiat-to-crypto conversion services complement the new merchant acceptance offering.

Service availability depends on customer eligibility, geography, payment corridors and applicable compliance checks.

WHO CAN USE IT

eazypay24

Designed for ambitious businesses

E-COMMERCE

Online stores, marketplaces and digital services.

TRAVEL & HOSPITALITY

Hotels, travel operators and booking-led businesses.

SUBSCRIPTIONS

Recurring billing and repeat-payment business models.

FINANCIAL SERVICES

Eligible fintech and financial-service use cases.

INTERNATIONAL MERCHANTS

Businesses serving customers across multiple markets.

SPECIALIST VERTICALS

Eligible high-risk sectors, subject to enhanced review.

Contact eazypay24 to confirm supported card schemes, markets, currencies, settlement schedules, fees, merchant eligibility and onboarding requirements.

GETTING STARTED

eazypay24

A clear path from enquiry to go-live

01 DISCOVER	Understand the business model, markets, currencies, expected volumes and payment needs.
02 UNDERWRITE	Complete KYB/KYC, risk assessment, compliance checks and commercial review.
03 INTEGRATE	Choose hosted checkout, API or another supported integration; test in sandbox.
04 LAUNCH	Receive production approval and credentials, then monitor transactions and performance.

Go-live timing depends on documentation, risk approval, integration scope and third-party processing readiness.
